Career Objective:

Aspiring Python Backend and AI Application Developer with hands-on experience in building FastAPI applications, integrating databases, developing RAG-based systems, and implementing AI agents with tool-calling capabilities. Skilled in Python, SQL, API integration, LangChain, and backend deployment. Passionate about learning new technologies and developing practical AI-powered solutions. Seeking an opportunity to contribute technical skills, problem-solving abilities, and continuous learning mindset in a growth-oriented organization.

TECHNICAL SKILLS

Programming Languages:

Python ,JavaScript (Basic)

Backend Development:

FastAPI ,Uvicorn

Database:

SQL, MySQL

Tools and Platforms:

Git, GitHub, VS Code, Excel, Render

AI & LLM Technologies:

LangChain ,RAG (Retrieval-Augmented Generation) ,Agentic AI ,Tool Calling , Prompt Engineering

APIs & Integration:

REST APIs ,Requests Library , API Integration

Concepts:

OOPs , CRUD Operations ,Database Design ,Client-Server Architecture

Soft skills:

Fast Learner, Problem Solving, Team Collaboration

PROJECTS

PDF Analyzer using RAG Pipeline

Technologies: Python, FastAPI, LangChain, Vector Database, RAG, Streamlit

- Developed an AI-powered PDF Analyzer using Retrieval-Augmented Generation (RAG).
- Implemented document loading, text chunking, embedding generation, and vector storage.
- Enabled users to ask questions from uploaded PDF documents.
- Improved response accuracy through context retrieval before LLM generation.
- Built backend APIs for document processing and querying.

Customer Support Agent

Technologies: Python, FastAPI, LangChain, SQL, REST APIs ,Streamlit

- Developed an AI-powered Customer Support Agent using LangChain and tool-calling architecture.
- Integrated multiple tools including SQL database querying, web search, and external API calls.
- Implemented agent-based decision making to select appropriate tools based on user queries.
- Built FastAPI endpoints for handling customer requests and responses.
- Designed modular and scalable backend architecture for AI workflows.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering (IoT)

Visvodaya Engineering College, Kavali (2021 – 2025)

CGPA: 7.9

Intermediate (MPC)

Sai Cooperative Junior College, Kavali (2021)

Percentage: 91%

SSC

Global English Medium High School (2019)

Percentage: 91.2%

CERTIFICATIONS

- Internship Certification in Web Development
- NPTEL Certification
- HackerRank Problem Solving Badge
- HackerRank Python Badge

INTERNSHIP EXPERIENCE

Web Development Intern

KJ Systems, Vijayawada, Andhra Pradesh

Oct 2025 – Dec 2025

- Learned and worked with HTML, CSS, JavaScript, and Bootstrap
- Assisted in developing responsive web pages and UI components
- Gained practical exposure to frontend web development concepts
- Worked on webpage structure, styling, and responsive layouts
- Performed application deployment and testing during project development
